Matters in Shape for Contractors to Commence Work.

INCENDIARY

Blaze in Paper Storage Room of Petersburg Bag and Trunk Factory Threatens Plant.

PETERSBURG, VA., August 17.-Mr. J. N. Whittaker, of the United States district attorney's office in Richmond, was in the city to-day, attending to legal the Appomattox River. The Atlantic Coast Line and Norfolk and Western Railroad Companies own several small tracts of land on each side of the river, which are within the territory necessary to the work of diverting the channel of river, and there has been some delay

in the adjustment of legal papers regarding the property.

Mr. Whittaker examined the titles to the lands in question, and, as a representative of the government, conferred with representatives of the two railroads, and it is now stated on reliable authority that matters have been so arranged as to permit the beginning of work on the diversion of the river as soon as the conversion of the river as soon as the con

version of the river as soon as the contractors are ready.

The Atlantic Dredging Company, of Philadelphia, secured the contract on a bid of \$132,000, but have not yet stated when they will begin the work, which is required by the contract to be commenced within sixty days after the date of the award.

· INCENDIARY FIRES.

Two small fires occurred last night, both of which are believed to have been

hoth of which are believed to have been of incendiary origin.

An unoccupied tenement house on Shuck Alley, in the rear of the Cameron to-bacco factory, was partially burned, but the firemen extinguished the flames before much damage was done. The loss was very small.

Shortly after 1 o'clock Police Officer Damage discovered as fire in the paper.

It was found that benzine had been poured over a quantity of paper in the storage room, and that the desks in the office had been entered. The loss amounts to one hundred and lifty or two hundred dollars, partly covered by insurance. The police are at work on the matter of this incendiarism, but no arrests have yet been made.

NO AUGUST COURT. The Hustings Court of this city will not hold any August term, and Judge Mullen is spending his vacation at Mont-

vate. Va

The Matoaca Cotton Mills, which belong to the Virginia Consolidated Milling
Company, have stopped work, except in
the weaving department.

is bad air this insidious foe to health is found. Poisonous vapors and gases from sewers, and the musty air of damp cellars are laden with the germs of this miserable disease, which are breathed into the lungs and taken up by the blood and transmitted to every part of the body. Then you begin to feel out of sorts sissippi Blyor and became so impregnated with without ever suspecting the Maiariathat for a year afterwards I was aphysical week. No energy or apperitie, duil headaches, sleepy ria eradicators, but nothing did me any good unand tired and completely til I began to use S. S. S., which I did about year fagged-out from the slightest exertion, are some of the deplorable effects of this enfeebling mylady. As the disease and would advise everybody else to follow my exprogresses and the blood becomes more deeply poisoned, boils and abscesses and dark or yellow spots appear upon the skin. When the poison is left to ferment and the microbes and germs to multiply in the blood, Liver and Kidney troubles and other serious complications often arise. As Malaria begins and develops in the blood, the treatment to be effective must begin there too. S. S. S. destroys the germs and poisons and purifies the polluted blood. S. S. The sun shone hot, but there was a pleasant breeze stirring, yet not enough to deflect the flight of the targets. To enliven the occasion the Blackstone was present, and played some beautiful airs between the events.

deautiful airs between the events.

High professional average for the two days was won by Mr. J. Mowell Hawkins, of the Winchester Repeating Arms Company, while second average went to happy Emery Storr, of the Peters Cartridge Company.

High amateur average for two days was won by Mr. Walls, of North Carolina. Mr. Hammond, of Richmond, captured second amateur average for the two days. He was the only amateur to make a straight on the second day.

The silding handicap was used, and, of course, the scores are not what they would have been had all shot from sixteen yards, but it is undoubtedly the most equitable system that can be used and all were pleased with it.

GOOD SHOOTING,

Mr. E. W. Sanford, the popular president of the club, and one of the best silooters in the State, won the prize in the special event—a 25 gun—on the good score of 12 out of 25.

Mr. W. C. Lynham, of Richmond, had charge of the traps, while the general mansgement was under the supervision of J. A. Anderson, and everything passed off in the most pleasant manner.

The Richmond shooters returned tonight on the 6:30 train, loaded down with trophites of the shoot. All were loud in the praise of the aftention and good time given them. The scores:

(Special to The Times-Dispatch.)
NEWPORT NEWS, VA., Apg. 17.—It was learned here to-day that the Tidewater Rallway Company has secured con trol of the old Farmville and Pownatar Railway, which would give it a right of way from Farmville to Bermuda Hundred, just above City Point, on the James River.

It is believed that the line will be built from the West Virginia coal fields to Bermuda Hundred, and that temporarily tile freight of the road will be barged down the James River to Newport News and Norfolk, at both of which points the Tidewater holds options on piers and

terminal porperty:
It is said that the topography of the Bernuda Hundred section is favorable to bringing the James River at that point, and it is believed here the track of the Tidewater Company finally will come into Newport News.

Surveys were made some months ago from Rosney, in Buckingham, the ter-ninus of the Chesapeake and Ohlo's Buckingham Branch, to a point on the Parmyille and Powhatan. It was thought at the time the survey was made for the Chesapeake and Ohlo. This was denied.

The body had a most unusual appearance. It was as large as a coraman; or, as it is termed on the earth, a horse. Around the body there was a strange vibration or motion of air. This motion of the air seemed to be affected as if by the operating of large fans.

The commotion seemed to be entirely beneath the body, and Professor Swoggleman thinks that the air was used to hold it up and give it motion.

There was no light connected with the body. Professor Swoggleman thinks that it could not have been a meteor, unless it was just beginning its journey and had not attained the general characteristics of an teroilte.

The body passed on the west side of this planet, and Professor Swogleman was able to see it by the aid of his transreflector. The transreflector is a new invention of the Professor's bid which he can see on any side of our planets.
